

ENEA/ACS/CLIM-MOD - ENEA Research Center Casaccia

Rome (Italy)

Field of activity of the research laboratory: Climate Science

Name of researchers involved: Sandro Calmanti
Alessandro Dell'Aquila
Paolo Ruti
Gianmaria Sannino

Languages spoken: English, French

The lab uses advanced computational mainframes. Notice however that only a small portion of these facilities are located in the research centre. We produce high-resolution climate change scenario for the Mediterranean region (EU-funded project CIRCE). We are also involved with research projects on climate variability in West Africa (EU-funded project AMMA).

Website ENEA: <http://wwwcas.casaccia.enea.it/sicri/>
